

Name	Jitendra Padmanabhuni
Roll Number	20MA20039

Entity Relationship Diagram for the ERP Website

About the Website

The ERP site was created using the django framework which helps us make various tables and allows easy integration with the front-end portion of the website.

The website includes a main login page where one can login as a student, faculty or as the admin.

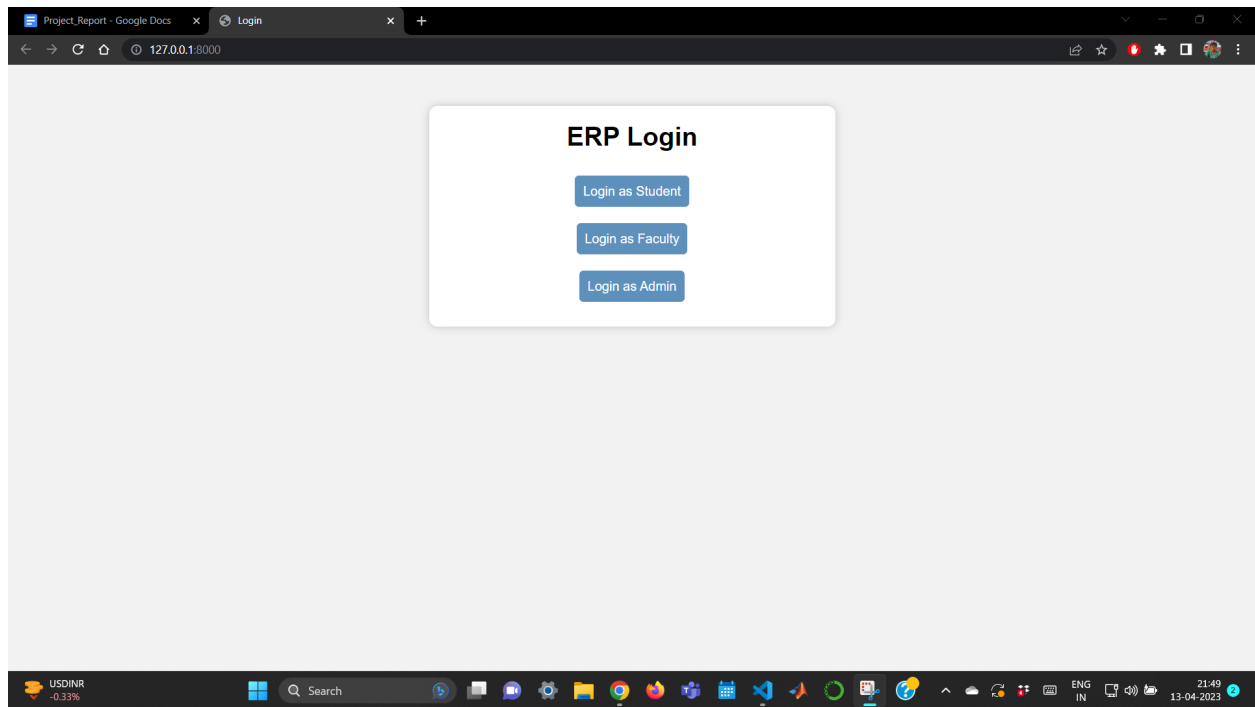

The student login enables the student to see their details and the courses that they are enrolled in. They can also access the list of Departments, Faculty and available Courses.

The faculty login enables the faculty to see their details and the courses that they are currently teaching. They can also access the list of Departments, Faculty and available Courses.

The admin login enables the admin to view all the records from courses, students, departments, faculty and enrollments. The website also enables the admin to update the records and to add or delete new records.
